

Test 2.0

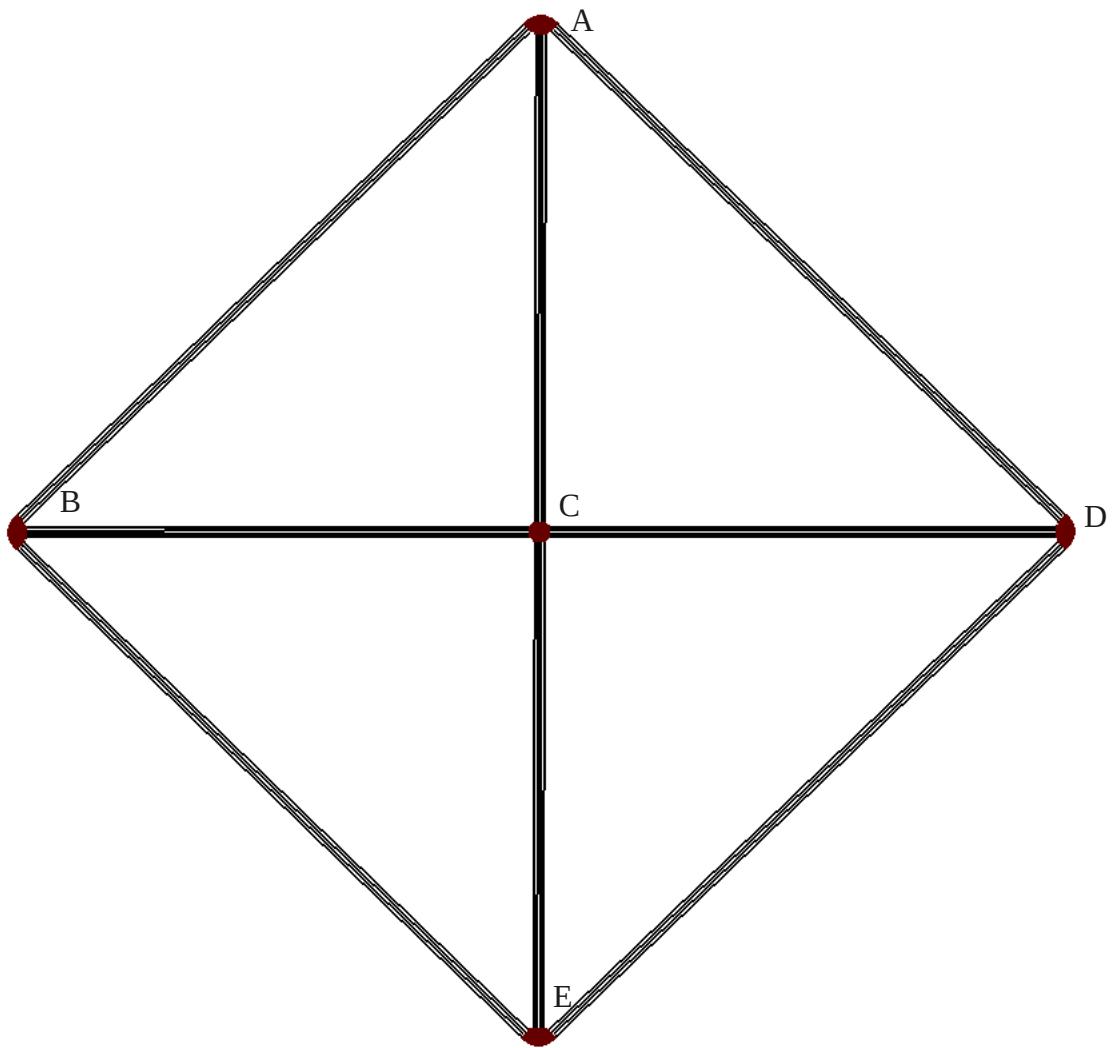

5 Junctions each with Traffic signals
random traffic

simulated for 86400s = 24 hours

Data definitions:
Junctions names A B C ...

edge from A to B is AB
edge from B to A is BA
and so on

12 edges 5 nodes

Columns in csv:

Time

Vehicle Count at Junction A

Vehicle Count at Junction B

Vehicle Count at Junction C

Vehicle Count at Junction D

Vehicle Count at Junction E

Avg Speed on AB

Avg Speed on AC

Avg Speed on AD

Avg Speed on BA

Avg Speed on CA

Avg Speed on CB

Avg Speed on CD

Avg Speed on CE

Avg Speed on DA

Avg Speed on DC

Avg Speed on DE

Avg Speed on EB

Avg Speed on EC

Avg Speed on ED
